Managed Backup
for Cohesity

SECURE

Defend your data with
on-premises, managed backup.

MANAGED BACKUP FOR COHESITY

Protect your data with seamless, scalable backup.

Many businesses rely on on-premises backup for its speed, security, and convenience, but need help with the time and expense of backup management. 11:11 Managed Backup for Cohesity eliminates the complexity of legacy backup infrastructure, providing a simplified, powerful, fully managed solution to protect your on-premises backup data.

Simplify your Backup policy management with one convenient global template

11:11 Managed Backup for Cohesity unites Cohesity DataProtect, the award-winning backup solution, with 11:11's expertise in data protection. By deploying a Cohesity-powered Backup appliance with integrated security on-site alongside 11:11's onboarding, configuration, and ongoing management, customers will benefit from secure, scalable backup in a single, unified, seamless solution.

As a fully managed service, 11:11 provides comprehensive onboarding and continuous monitoring services to tune your backup operation for optimal performance. From integrations of workload to policy management to backup job monitoring, we focus on backup management, so you don't have to.

Award-winning Backup with integrated data security

The Cohesity DataProtect platform delivers lightning-fast recovery that meets the most stringent recovery point (RPO) and recovery time objectives (RTO). Updating the software requires zero downtime, and with the highly-redundant operation, all data is always available with some of the industry's best deduplication capabilities. That means your backup management is not only fully protected, but it also helps you control costs.

Featuring a Zero Trust defense, 11:11 Managed Backup prevents unauthorized access to valuable backup files. The additional Threat Defense layer delivers immutable snapshots and DataLock to make them tamper-proof against advanced ransomware. Plus, every 11:11 Managed Backup for Cohesity deployment comes with an intelligent AI-driven engine that can detect anomalies in the backup data, offering sophisticated ransomware protection as part of its DNA.

MBC
Managed Backup
for Cohesity

11:11 Managed Backup for Cohesity provides fast, secure, and reliable managed backup.

Key Benefits:

- Simplify backup with a modern hyper-scale solution and expertly-managed services.
- Reduce your overall total cost of ownership (TCO).
- Simplify data protection by eliminating backup siloes and managing backup and recovery through a single, integrated interface.
- Protect your data with industry-leading security while ensuring continuous accessibility and availability.
- Recover your data rapidly to meet (or exceed) business service-level agreements (SLAs).
- Scale-out quickly and easily to keep pace with business requirements.

Additional features:

- Proactive and reactive backup operation
- Comprehensive onboarding services
- Global, variable-length deduplication and compression
- Zero-trust security architecture
- Dedicated 24x7x365 customer support

Scale-out with ease

Unlike the siloed legacy backup solutions, 11:11 Managed Backup for Cohesity makes it simple to scale out. Add chassis or blades to grow on demand when you need to expand. Because storage goes into the overall pool, there's no waiting, no headaches, and no need to reconfigure.

Need help managing other areas of your IT environment?

11:11 Systems has experts, consulting services, and solutions ready to help strengthen your entire organization so you can truly affect digital transformation across your network. With the right cloud, connectivity, security solutions, and professional services, we can help you ensure your systems and data are always running, accessible, and protected.
